The art of outdoor living with Solarium Optimum!

**SOLARIUM Optimum offers a unique product
in the world of three season solariums.**

A relaxation area, which will make you appreciate all the
seasons, sheltered from mosquitoes and bad weather!

TRADITIONAL MODEL

*Sun*LOFT
HYBRID

The art of living outdoors

Solarium Optimum offers you a relaxation area that will make you appreciate the summer season while being protected from mosquitoes and bad weather! And for the winter, you will no longer have to worry about maintenance since our structure withstands snow load without action on your part!

All of our models can be installed on most balconies and decks.

The biggest advantages to remember from Solarium Optimum, are:

- Our extruded aluminum structure, in conformity with the National Building Code;
- Our tempered glass roofs with a limited lifetime warranty;
- Our glass overhang that protects the walls and facilitates their maintenance;
- Our lightweight flexible elastomer walls with molecular memory, for better resistance;
- Our retractable screen windows providing a clear view and simplifying maintenance;

Rain or shine, you will fully enjoy Solarium Optimum products, havens of peace and serenity, inviting nature into your home!

The elastomer is an elastic polymer that returns to its original shape after stretching.

CATHEDRAL MODEL

SunLOFT
HYBRID

ADVANTAGES EXCLUSIVE to Solarium Optimum

- **Our hybrid and lightweight concept, the best of both worlds!**

Patented structure: Our hybrid structure, made of aluminum and covered with pvc for a well-crafted finish is engineer-approved to withstand snow loads.

Elastomer wall: Solarium Optimum developed a unique formula to meet our high-quality standards: Flexible to the movement of the ground, molecular memory to resist cold as well UV rays, non-flammable, and contains a fungicide to maximize its lifespan. A ten-year pro-rated warranty applies.

- **Glass roof with overhang:**

In terms of safety, our tempered glass roofs represent the most durable and resistant product on the market. Standard-tinted, our glass roofs feature protection against damaging UV rays. All of our glass roofs come with our Limited LIFETIME WARRANTY.

The overhang is another advantage exclusive to Solarium Optimum. Whether for the cleanliness of the wall modules or to allow for the opening of your windows in rainy weather, the overhang will make all the difference!

- **Colours :**

A choice of colours is available for the structure:
For our translucent elastomer, you have the choice between "smoked" and "charcoal."

- **Single hung window with retractable screen mesh:**

A customer favourite!

The screen mesh disappears as needed to provide clear vision. For your comfort, it opens from the top to evacuate hot air and for better air circulation. The lateral side locks allow you to open the window according to the needs of the moment!

- **Universal door:**

Our modular concept allows for versatile installation, at the front or at the sides, opening to the left or to the right, according to your needs.

- **A versatile modular concept that is easy to install!**

Most DIYers will appreciate our modular concept that is easy to install in just 1 or 2 days! All of our roof and wall modules are manufactured and pre-assembled at the factory for exceptional quality. The modules join together with a simple "click" using stylized mouldings.

An instruction manual and video are available to guide you and, if necessary, our team of experts can support and advise you.

Our modular concept extends equally to derivative products such as the permanent glass awning, the SkyLOFT®, the SpaLOFT®, the Veranda and the CarPORT.

- **Two-way shades:**

OptiBloc® shades are the must-have solution to protect you from the sun. Made with a multilayer material that blocks heat, reduces the sun's rays by 98% and is resistant to UV rays, your comfort is assured, even during a heat wave!

Since the opening can be done on both sides, and the OptiBloc® shades are equipped with an integrated brake system, you can make the most of your summer!

- **Roof ventilation - SpaLOFT®**

The SpaLOFT®, designed to house a spa or hot tub, has a ventilation grid on the roof allowing for the evacuation of hot and humid air.

- **Optimum Rewards Program**

Satisfied with your Solarium Optimum products?

The Optimum rewards program is aimed at expressing gratitude for our customers and distributors who refer us to another customer who acquires a solarium, awning or carport.

Simply download and fill out the form at www.solariumoptimum.com to get your \$100 or \$200 reward!

NEW at SOLARIUM Optimum!

- **High-end permanent car shelter, discreet and luxurious, easy to install!**

Our permanent car shelter, the CarPORT, saves you from the exorbitant costs of building a garage. A four-season aluminum structure with glass roof backed by a limited lifetime warranty. Choice of three basic colours.

- **LED-integrated lighting** (optional):

For subdued or more illuminated evenings, opt for our high-power LED fixtures with dimmer integrated discreetly into the structure of your solarium, awning or carport.

SOLARIUM Optimum Inc, is ;
